

c programming assignment 1

Mandanka Prince

August 2025

1 22. Net sales with 10.

```
#include <stdio.h>
int main() {
    float gross, discount, net;
    printf("Enter gross sales amount: ");
    scanf("%f", &gross);
    discount= 0.10 * gross;
    net = gross - discount;
    printf("net sales = %.2f\n", net);
    return 0;
}
```

The screenshot shows a C program being executed in an IDE. The code is as follows:

```
main.c
1 #include <stdio.h>
2 int main() {
3     float gross, discount, net;
4     printf("Enter gross sales amount: ");
5     scanf("%f", &gross);
6     discount= 0.10 * gross;
7     net = gross - discount;
8     printf("net sales = %.2f\n", net);
9     return 0;
10 }
```

The output of the program is:

```
Output
Enter gross sales amount: 30000
net sales = 27000.00

=== Code Execution Successful ===
```
