

c programming assignment 1

Mandanka Prince

August 2025

1 6. Convert hours into minutes.

```
#include <stdio.h>
int main() {
    int hours, minutes;
    printf("Enter hours: ");
    scanf("%d", &hours);
    minutes = hours * 60;
    printf("%d hours = %d minutes\n", hours, minutes);
    return 0;
}
```

The screenshot shows a code editor with a file named 'main.c'. The code is as follows:

```
1 #include <stdio.h>
2 int main() {
3     int hours, minutes;
4     printf("Enter hours: ");
5     scanf("%d", &hours);
6     minutes = hours * 60;
7     printf("%d hours = %d minutes\n", hours, minutes);
8     return 0;
9 }
```

Below the code editor, there is an 'Output' window. It displays the following text:

```
Enter hours: 6
6 hours = 360 minutes

=== Code Execution Successful ===
```
